

Lysimaxos Lepesiotis

Full Stack Developer

PERSONAL INFORMATION:

Location: Thessaloníki, Greece

Phone number: 698 596 5862

Email: llepesiotis@gmail.com

Profile:

As full-stack developer, I bring a dynamic blend of creativity and technical prowess to every project. From crafting, user-friendly interfaces to diving deep into Back-end complexities, I thrive on delivering solutions that exceed expectations.

Notable Projects:

As a notable project, I developed a real time messaging web app (Back-end: Python Flask and SQL, Front-end: Js, Html, Css). Allowing multiple people to communicate in real time using specific thematic chat rooms. The project includes user authentication and data encryption.

Another venture includes a website connected to the NASA API, offering learning channels and the friendly display of data to space enthusiasts. The website has a build-in search engine i created for the users to utilize, exploring a greater amount of data.

Lastly, a simpler project involves the development of a General Web Scraper app, build with Python. The program can return savable data from numerous websites. The targeted data are determined by specifying the HTML element type and its class name (optional).

Certifications:

- Responsive Web Design
- JavaScript Algorithms and Data Structures
- Scientific Computing with Python

Skills:

- Python
- SQL
- HTML/CSS
- JavaScript
- TypeScript
- React

Languages:

- English
- Greek
